

INTEGRAL APPROACH OSH IN EU RESEARCH

How to get your expertise embedded?

Jan Michiel Meeuwsen, PEROSH

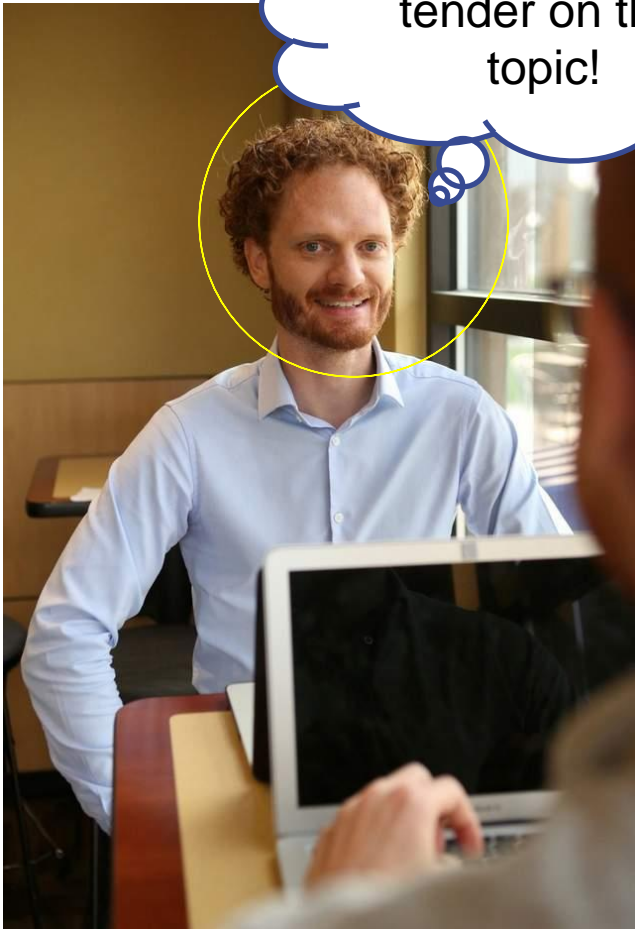

3D CINEMA

3D CINEMA & EPILEPSY

We want an EU
tender on this
topic!

Warning: this is a researcher!

DO NOTS

- Believe that your research is unique and the rest of the world is dying to hear from you
- Focus on a small expertise area and hope for the best
- Believe that those monkeys in Brussels just need some thorough convincing
- Refer to the EU as the European Community
- ...

- Vote for a party that wants your country to leave the EU

DO'S

- Become a Brussels watcher
- Read everything on the latest EU developments; especially research (HORIZON 2020 and FP9)
- Know what challenges the EU has defined and how your research could fit in
- Become intimate friends with your NCP
- Visit Brussels and join an event

HOW TO BECOME EMBEDDED?

EMBEDDED RESEARCHER

- Realise that your expertise can form a crucial part in a larger area; e.g. exposure to 3D cinema screening is part of new exposures due to new technologies
- Consequently, study those other areas as well and see how you could connect; block chain, sharing economy
- Think multidisciplinary
- Think applied; how can policy makers, industry use my results

GOOD LUCK!
